

PROJECT STATE

Name: Sunjeet Jena
ASUID: 1218420294

1. Initially I faced some problems to create app_info objects, but was able to solve it. I also faced some issues with truncating the decimal points, but was able to solve with help of the internet search.

I also faced a lot of problem while implementing the deletion operation in BST but was finally able to accomplish it by going through references.

2. No Known Bugs.

3. For the final submission there are no incomplete implementations.

4. All the interactions and discussions were through Piazza.

5. The primary references are :

a) C++ Primer, Fifth Edition by Stanley B. Lippman, Josée Lajoie, Barbara E. Moo Chapter 3,4 and Chapter 12.

b) GeeksforGeeks.com

<https://www.geeksforgeeks.org/binary-search-tree-data-structure/> (Covers concepts of BST)

<https://www.geeksforgeeks.org/deletion-binary-tree/> (Deletions of a node in BST)

c) Techie Delight

<https://www.techiedelight.com/deletion-from-bst/> (Deletion of node in BST)
